NOTE FOR: DDS&T

Evan,

Thank you for your comments of 2 August on living with the Congressional reductions in 1985 manpower levels. Your case is solid and your memo articulate. Taking everything into account, however, I continue to favor alternative three, which does give S&T a noteworthy break over a strict adherence to the original program ranking. We will try to be helpful as we go through the '86 Review.

2 AUG 1984

MEMORANDUM FOR: Executive Director

FROM: R. E. Hineman
Deputy Director for Science and TechnologySUBJECT: Accommodating Congressional Reductions in
FY 1985 Manpower

1. I am concerned about the impact of the Comptroller's Alternative III proposal for coping with Congressional position reductions in FY 1985. Even in Alternative III, high priority DS&T initiatives remain critically undermanned.

2. This situation arises because certain DS&T tasks have to be done -- handling of the IMCS collection and support to national programs are two prime examples. I cannot defer these responsibilities or perform in a substandard manner; the stakes are too large. My only choice is to apply the [] additional positions that Alternative III provides over Alternative II against the [] positions required in FY 1985 to support IMCS and the national programs. The result is that key projects such as:

25X1

25X1

25X1

[]

still will not have the required additional positions. And, the IMCS and national program efforts are still understaffed!

3. For these reasons, I am compelled to support Alternative I. The additional [] positions provided to the DS&T by this alternative are essential to provide the additional manpower required by the high priority projects outlined in paragraph 2 above.
